TWO BURNER
Propane Drop-In Cookstove**Model #00-2BP**

Product Includes:
Hardwood cutting board insert
Sea rail and pot holders
Mounting brackets
Push button starter

The Dickinson TWO BURNER Drop-in Cook-Top is the perfect solution for the galley of a small boat. It is attractive and versatile and its burner performance. The Dickinson Cooktop fits in standard cut-out dimensions, as above. The cooker features a hardwood cutting board that fits into the cooker when the appliance is not in use, pot holders, and the most powerful propane burner of any marine appliance today!

This cooker is all stainless construction and will not rattle at all while the boat is underway. A push and turn electric igniter is provided with an integral 9v power supply so you will not have to connect to or rely on your 12vdc power system. Cooktop parts are removable for easy cleaning.

The appliance uses low pressure propane, available on most boats and features independent thermocouple flame shut off devices on each burner. Installation brackets are provided and easy to use and the gas is connected with a 3/8ths" flare fitting.
